

ATIKUR SATTER MONDAL

Full-Stack Developer

+91 9382820248 | Hyderabad, India | atikursattermondal@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Results-driven Full-Stack Developer with 4+ years of experience building scalable, secure, and high-performance web applications using Angular, React, Node.js, and PostgreSQL. Proven expertise in developing KYC and AI/ML data platforms, implementing real-time communication with WebSockets, and ensuring data security. Experienced in designing analytics dashboards, optimizing backend performance, and collaborating with cross-functional teams to deliver reliable, production-grade solutions.

SKILLS

Languages	JavaScript, TypeScript, SQL, HTML, CSS
Frameworks	Angular, React.js, Node.js, Express.js, Next.js, Bootstrap, Angular Material, Tailwind CSS, Redux, Socket.IO
Databases	PostgreSQL, MongoDB, Firebase Firestore
Concepts	RESTful APIs, WebSockets, Authentication (JWT, OAuth), Google Cloud Platform (GCP)
Tools	Git, GitHub, GitLab, VS Code, Postman

EXPERIENCE

Research & Development Engineer

Dec 2021 — Present

Jukshio Technology Innovation Private Limited

Hyderabad, India

- Developed and optimized high-traffic KYC, recruitment, and AI/ML data curation platforms using Angular, React, Node.js, and PostgreSQL, supporting over 20,000 daily users.
- Built an AI-driven recruitment and interview platform using React, Context API, and plain CSS, enabling company creation, role-based interview setup, and chat-based candidate assessments.
- Implemented multi-step workflows for company onboarding, interview configuration, AI-assisted question generation, review, and interview publishing.
- Designed candidate evaluation dashboards with company-wise analytics, interview statistics, chat history review, question-wise ratings, and performance comparisons.
- Integrated WebSocket-based real-time communication for video KYC and live agent-customer interactions, reducing verification turnaround time.
- Led development of an AI/ML data curation dashboard used by 400–500 daily users, improving model training accuracy through structured data review workflows.
- Optimized backend queries, pagination, and API performance, significantly reducing dashboard load times and improving system scalability.

Frontend Developer Intern

Aug 2021 — Nov 2021

Sukshi Academy

Hyderabad, India

- Completed an intensive 4-month training program focused on frontend development fundamentals using HTML, CSS, JavaScript, TypeScript, and Angular.
- Developed responsive user interfaces for an AI/ML-based application by translating Figma designs into production-ready Angular components.
- Integrated frontend components with RESTful APIs to enable seamless data flow between UI and backend services.
- Collaborated closely with backend and AI/ML teams to ensure consistent UI/UX and successful end-to-end application deployment.

PROJECTS

KYC Application

Angular, Angular Material, Bootstrap

- Led the development of a digital KYC solution for organizations such as Manappuram and Muthoot, transforming manual verification into a seamless online process.
- Implemented an intuitive user interface based on Figma designs, enabling users to upload and verify KYC documents including Aadhaar, Voter ID, Driving License, and Passport with front and back captures.
- Integrated Go-based APIs for document verification, face matching, and name validation to ensure regulatory compliance.
- Designed and managed global state handling across the application to maintain consistent and accurate user information throughout the KYC workflow.
- Built a flexible data submission system allowing customer-specific KYC data structures to support diverse organizational requirements.

AI Interview & Recruitment Platform

React, Context API, CSS, Material UI

- Built a web-based recruitment platform to manage companies, roles, candidates, and AI-driven interviews through a structured, multi-step workflow.
- Implemented an admin interface to create and manage company profiles with detailed information using step-by-step multi-form applications.

- Developed role-based interview creation flows, including job description setup, AI-assisted question generation, review pages, and final interview publishing.
- Designed a chat-based interview interface where candidates answer questions sequentially, supporting multiple question types such as text, multiple choice, image, audio, and video.
- Integrated React Context API for global state management across complex multi-step forms and interview flows.
- Built company-wise candidate review dashboards with interview statistics, comparative analysis, chat history review, question-wise ratings, and evaluation summaries.
- Collaborated with backend services built in Python and MongoDB to manage interviews, candidate data, and AI-generated content.
- Developed responsive UI components using plain CSS and Material UI, ensuring usability across desktop and mobile devices.

Customer KYC Dashboard

Angular, Angular Material, Bootstrap, Chart.js, Node.js, Express.js, PostgreSQL, GCP

- Developed a robust KYC dashboard for tracking and analyzing customer verification data, improving transparency and efficiency in the onboarding process.
- Implemented an Overview page featuring date-filtered transaction counts, line graphs, recent transactions, and success, rejection, and incomplete case breakdowns.
- Designed an Onboarding History page with paginated transaction details, verification steps, failure reasons, and document images to support comprehensive audit trails.
- Built an Analytics page with API-wise transaction graphs, success and failure metrics, and invoice validation tools for clients.
- Optimized backend performance using Node.js, Express.js, and PostgreSQL, leveraging GCP for scalable and secure data storage.

AI/ML Curation Dashboard

Angular, Bootstrap, Node.js, PostgreSQL, GCP, Azure

- Developed an internal AI/ML data curation dashboard used by 400–500 users daily across shifts to improve model training accuracy while maintaining data security.
- Implemented role-based authentication enabling users to access and review specific data categories.
- Integrated GCP and Azure storage to securely fetch and display KYC-completed customer data while complying with encryption standards.
- Built interactive UI components for reviewing, flagging, and correcting data points to improve the quality of AI/ML training datasets.
- Developed Node.js REST APIs to retrieve, process, and securely store curated and flagged records for downstream analytics.

Video KYC Application

Angular, React.js, WebSocket, Node.js, PostgreSQL, GCP, Video SDK Live

- Developed a multi-role Video KYC platform with dedicated dashboards for agents, customers, auditors, and administrators.
- Integrated Video SDK Live to enable real-time video calls for digital identity verification without building custom video infrastructure.
- Built an Admin dashboard for agent management, call allocation, and auditor assignment.
- Developed an Agent dashboard enabling agents to manage availability, conduct live KYC calls, capture face liveness and PAN images, and securely store video recordings in GCP.
- Created an Auditor dashboard to review end-to-end KYC journeys, analyze face matching and document validation via Go APIs, and approve or reject transactions.
- Built a customer-facing interface using React.js for collecting personal details via DigiLocker or manual forms and initiating video KYC sessions.
- Engineered WebSocket-based real-time communication for low-latency agent-customer interactions, session management, and connection state handling.
- Developed a Node.js and Express.js backend to manage KYC data, video sessions, and encrypted document storage in GCP.

EDUCATION

Bachelor of Computer Science, The University of Burdwan
GPA: 8.39 (A+)

Jul 2018 — Jul 2021
Singur, Hooghly, West Bengal
